

Earthquake Sound presents its newest entry into the TITAN series, the Hestia high fidelity LCR speaker.

With a sleek exterior matched only by its performance, Hestia's slim cabinet design integrates the Acoustic Array System Design (AASD) technology to allow even audio distribution in a wider listening area.

Two 1" (25mm) silk dome tweeters positioned at the very front and center of the unit allow Hestia to achieve perfect positioning for wider dispersion and better image stability, allowing everyone in the room equal enjoyment of Hestia's superior performance.

The patented Piston-Max Technology (PMT) is integrated into Hestia's four 4" Kevlar cones to increase efficiency and accuracy of music reproduction. In addition, each Hestia driver is magnetically shielded to prevent interference from any nearby components (TV, receiver, Blu-Ray player, etc.)

Designed to be mounted on the wall, the Hestia features a Vari-Mount installation system that allows the speaker to be mounted horizontally for center channel speaker application or vertically when used as left, right or surround speaker.

MSRP: \$799.00 per piece

- Full range, magnetically shielded drivers with 4" Kevlar cones + Piston-Max patented technology
- Two 1" enhanced live action silk dome tweeters
- Gold plated push terminals
- Vari-Mount installation system for vertical/horizontal placement
- Internal aerodynamic motor (minimal turbulence)
- High pass 18dB/octave filter @ 4 kHz

Hestia Specifications

Frequency: 30Hz - 35kHz

Sensitivity: 89dB+-3dB

Nominal Impedance: 8

Power Handling: 300 Watts

Dimension (H,W,D): 7.25 x 31.5 x 3.4" / 184 x 800 x 84mm

Net Weight: 13.5 lbs. / 6.14 kg

Available Finish: Fine high gloss piano black lacquer
