- Massive 4" excursion
- Power 10,000 - 20,000 Max

	MSRP
HoLeeS-12	\$1,899
HoLeeS-15	\$2,499

## EARTHQUAKE'S MONSTER UNLEASHED

Earthquake Sound has been dominating and recreating the bass game for nearly 20 years now. Continuing the legacy is the HoLeeS line of subwoofers. The HoLeeS is a serious SPL pumping machine designed by serious audiophile engineers. These subs are true marvels in design and engineering. With three filed patents and ten patents pending, HoLeeS has redefined the power of the subwoofer.

With an 8" long by 4" wide four-layer voice coil that has a winding height of 3.5", this coil is never out of the metric gap, which is why the piston shaped cone construction never skips a beat. This design also accommodates the 4" of peak-to-peak excursion that HoLeeS is capable of delivering.

HoLeeS delivers an impact smoothness and depth of bass that is absolutely stunning and unmatched by any other manufacturer of high performance subwoofers. The HoLeeS line consists of two extremely high performance drivers: HoLeeS-12 and 15".
