***Earthquake includes two custom cloth grille rings so installers and consumers can agree on any color or textured cloth.**

A TRUE IN-WALL SUBWOOFER

This in-wall subwoofer establishes a new industry standard for in-wall speaker systems. Thor offers a no-compromise built-in solution for the finest home-theater and music systems. You won't believe your ears; the aural performance rivals the best free-standing systems.

Thor: The In-Wall Subwoofer that Goes Down to 20 Hz

Thor is easy to install in homes under construction and existing homes. Once the wiring is done, the Thor sub is screwed into the wall from the front. The Thor in-wall system is designed with the patented SWS (Shallow Woofer System) subwoofer driver and SLAPS (Symmetrically Loaded Audio Passive System) technologies which have made this revolution in home theater possible. Earthquake engineers meticulously designed the Thor to produce zero resonance, blend in well with any décor, and deliver unheard of bass from a shallow place.

MSRP: \$899.00
