

BT-4

BlueTech Wireless Music Receiver

OBJECTIVE

Earthquake's BT4 BlueTech Wireless Music Receiver allows you to stream audio from your Bluetooth enabled cell phone, PC, Laptop, iPhone®, iPad®, Android® or other audio player devices to your stereo system.

Designed with convenience in mind, the BT4 features fast and easy device pairing method, over 32 feet of open space wireless range and 3.5mm AUX LINE-OUT. It can remember up to 7 paired devices and will also auto-reconnects to the last paired device if it is within range.

INTENDED USE

- Wireless audio streaming solution for:
- ✓ iQuake system or any home stereo/audio system
 - ✓ Car stereo system
 - ✓ RVs & yachts
 - ✓ Offices, classrooms/dance studios
 - ✓ Party buses, limousines

With an impressive dynamic range of 10Hz to 20kHz, you can enjoy the music in your playlist without having your device tied to the stereo system.

SPECIAL FEATURES & HIGHLIGHTS

- Wirelessly stream music from an iPhone®, iPad®, Android® or any Bluetooth® enabled device
- Fast device pairing and low power consumption - comparable to Bluetooth V4.0
- Remembers up to 7 paired devices and auto-reconnects to the last paired device (if within range)
- Over 32 feet (10 meters) of open space wireless range
- LED operations indicator
- Supports aptX/AAC/SBC/MP3/Fast stream codec
- Audio quality with an impressive dynamic range of 10Hz - 20kHz
- AUX 3.5mm LINE-OUT, enabling it to connect to the AUX input in your home audio or pro audio amp/receiver, car stereos, etc.
- Compatible with all Bluetooth A2DP stereo enabled devices
